Third Quarter 2022 Highlights

- » Net investment income per share for the third quarter was \$0.33 per share, down \$0.14 per share as compared to the prior quarter, primarily due to a \$3.0 million, or \$0.23 per share, non-cash reversal of a previously accrued capital gains incentive fee. The reversal of a previously accrued capital gains incentive fee was due to aggregate net unrealized depreciation recognized during the second quarter primarily due to the widening of liquid credit market spreads
- » Excluding the impact of the capital gains incentive fee, Adjusted Net Investment Income¹ per share for the third quarter was \$0.33, up from \$0.24 per share in the prior quarter, primarily due to strong growth in interest and fee-related income
- » Loss per share for the third quarter was \$1.04. The net loss for the quarter was primarily due to net unrealized depreciation recognized during the quarter
- » Declared a distribution per share of \$0.30 for the fourth quarter of 2022; a 3.4% increase compared to the previous quarter²

OFS

Supplemental Schedule I

Supplemental Schedule I – Adjusted Net Investment Income

On a supplemental basis, we disclose Adjusted NII (including on a per share basis), which is a financial measure calculated and presented on basis other than in accordance with generally accepted accounting principles of the United States of America (“GAAP”). Adjusted NII represents net investment income, excluding the capital gains incentive fee, in periods in which such expense occurs. GAAP requires recognition of a capital gains incentive fee in our financial statements when aggregate net realized and unrealized capital gains, if any, on a cumulative basis from the date of the election to be a BDC through the reporting date is positive. Such fees are subject to further conditions specified in the investment advisory agreement with OFS Capital Management, LLC, principally related to the realization of such net gains, before OFS Capital Management, LLC is entitled to payment, and such recognized fees are subject to the risk of reversal should unrealized gains diminish to become losses. Management believes that Adjusted NII is a useful indicator of operations exclusive of any net capital gains incentive fee, as net investment income does not include the net gains, realized or unrealized, associated with the capital gains incentive fee.

Management believes Adjusted NII facilitates analysis of our results of operations and provides greater transparency into the determination of incentive fees. Adjusted NII is not meant as a substitute for net investment income determined in accordance with GAAP and should be considered in the context of the entirety of our reported results of operations, financial position and cash flows determined in accordance with GAAP

The following table provides a reconciliation from net investment income (the most comparable GAAP measure) to Adjusted NII for the quarter ended September 30, 2022 and June 30, 2022:

	September 30, 2022	June 30, 2022
